

## From analytical data to drug development insight

“ Every solution to every problem is simple. It’s the distance between the two where the mystery lies “

- Derek Landy

# Our product experience

## New Chemical Entities & Generics

- Chemical entities
- Peptides
- Oligonucleotides

## New Biological Entities & Biosimilars

- Monoclonal antibodies & Derivatives
- Proteins (e.g. enzymes)
- Vaccines

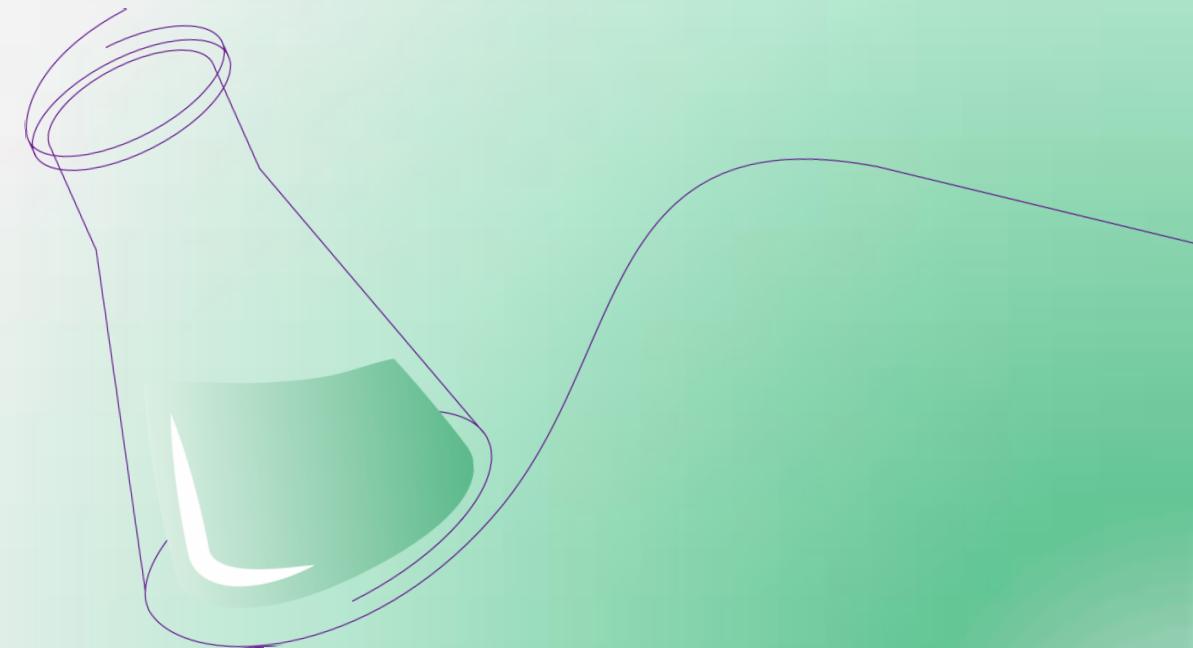

## Cell-based Medicinal Products/ ATMPs

- Stem cells
- Car-T, NK cells
- PBMCs
- mRNA vaccines

# Analytical methodology

Small Molecule Solutions

# Peptides & Oligonucleotides

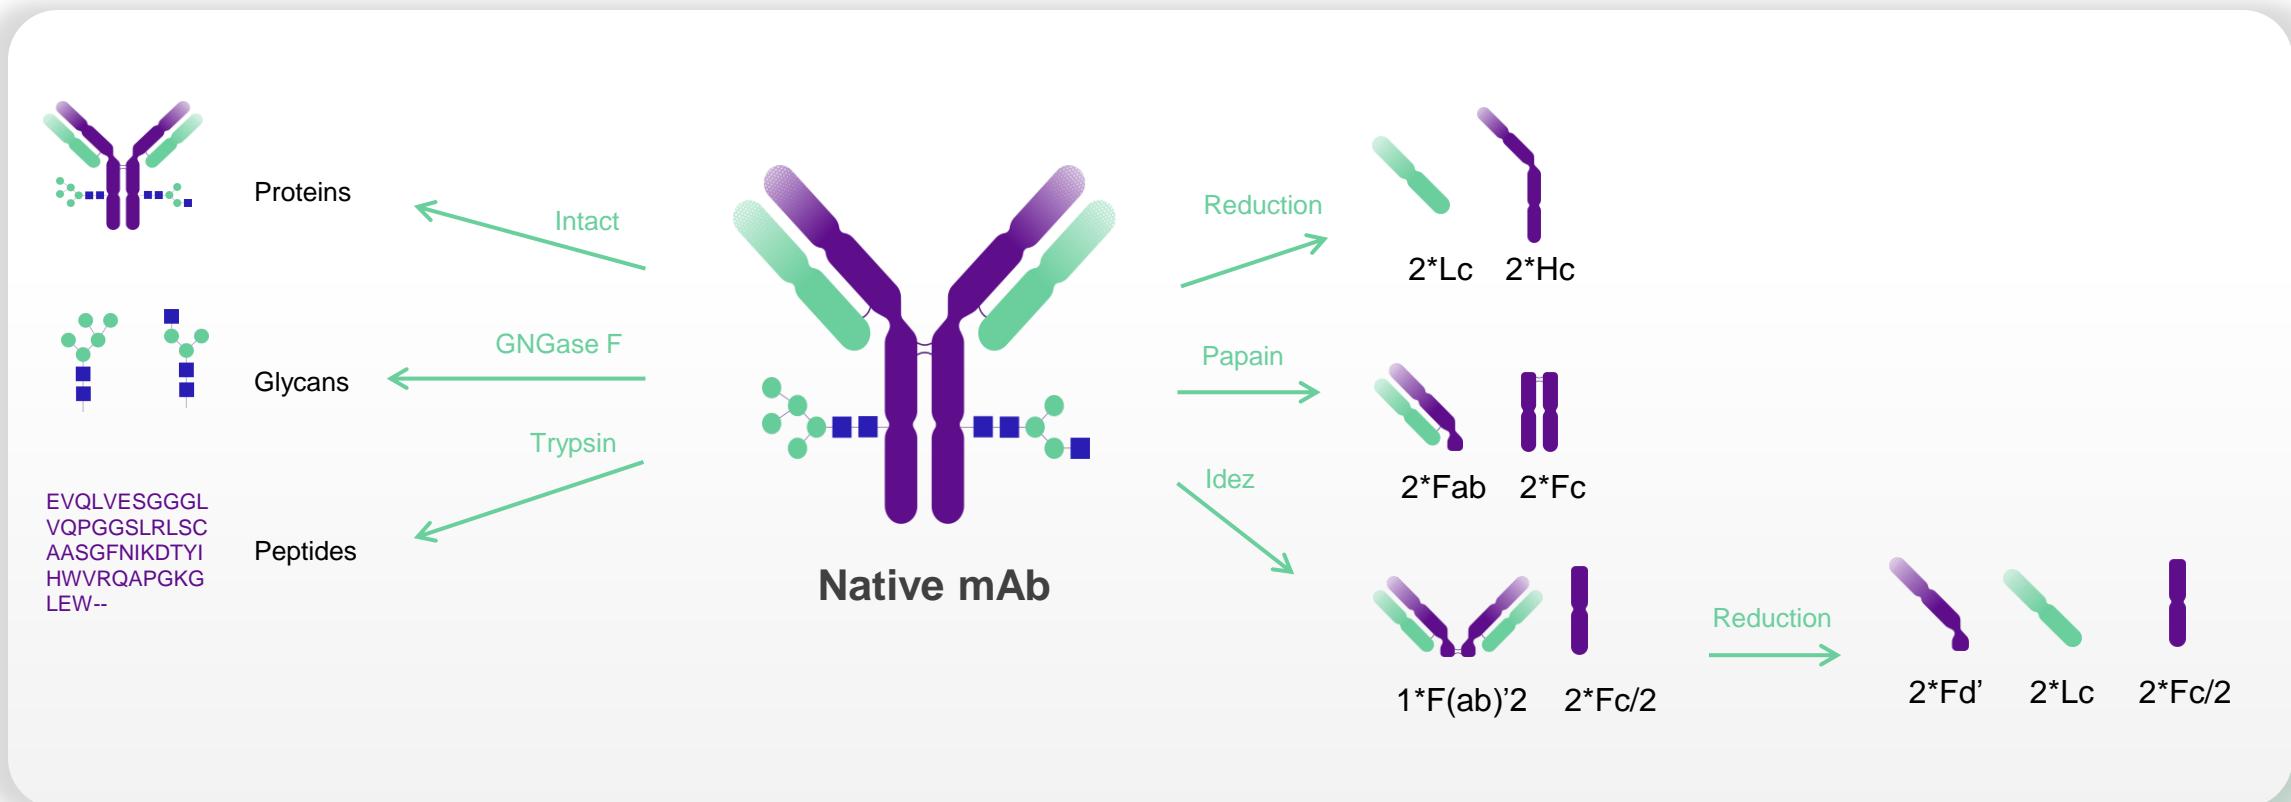

Product characterisation	Product attributes	Analytical method		
<b>General quality Physicochemical</b>	Appearance/ Clarity/ Color/ pH	Visual Inspection	Ph. Eur. 2.2.1/ Ph. Eur. 2.2.2/ Ph. Eur. 2.2.3	
	Osmolality	Osmometric	USP<785>/ Ph. Eur. 2.2.35	
	Particle contamination	Subvisible particles	Ph.Eur. 2.9.19 (method 1)	
	Extractable volume	USP<1>, Ph. Eur. 2.9.17		
	Uniformity of Dosage units	USP<905>, Ph. Eur. 2.9.40		
<b>Identity &amp; sequence</b>	Identity	MS/ UV	IR	
	Sequencing	HR-MS/ MS		
<b>Assay, purity &amp; content</b>	Assay/ purity	UPLC-UV	IEX-HPLC	IPRP-UV/ HPLV
	Purity/ impurity	LC-HRMS		
	Water content	KF		
	Residual solvents	GC		
	Counter ion	ICP-MS * / LC-UV		
<b>Activity</b>	Potency	ELISA/ Cell-based assays		

# Analytical methodology

Biologics Solutions

# mAb characterization

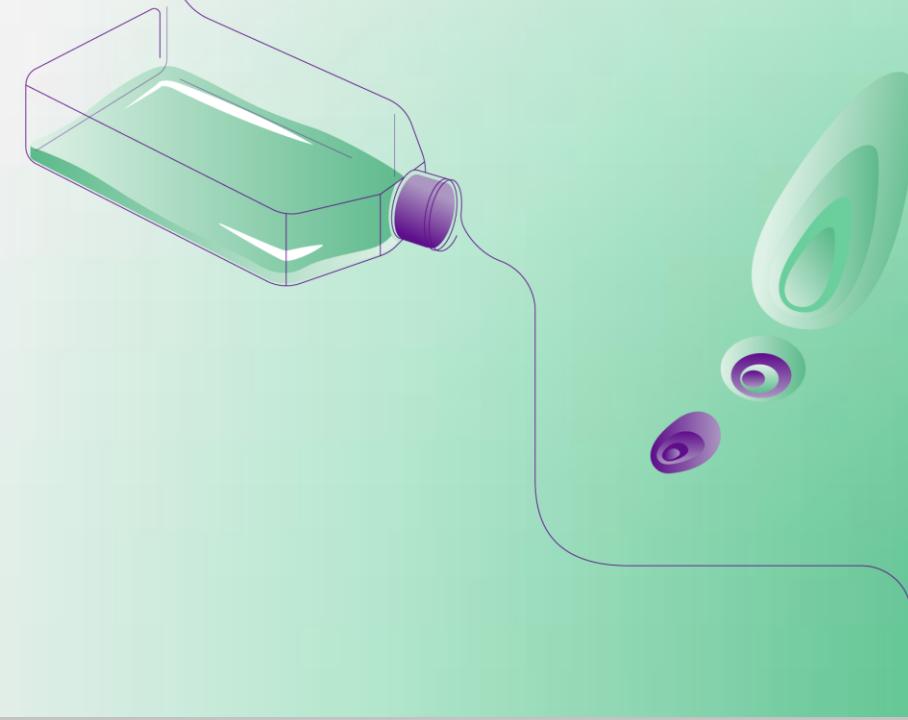

# mAb characterization

Product characterisation	Product attributes	Analytical method		
<b>General quality</b>	Appearance/ Clarity/ Color/ pH	Visual Inspection	Ph. Eur. 2.2.1/	Ph. Eur. 2.2.2/ Ph. Eur. 2.2.3
<b>Protein content</b>	Protein level	RP-(U) HPLC	MS	IEX-HPLC
	Amino acid composition	Hydrolysis FMOC/ OPA labelling		
	Molecular weight	HRMS		
<b>Primary structure</b>	Structural integrity	Peptide mapping		
	N-& O-glycosylation	Glycan analysis		
	N-&C-terminal sequence	Peptide mapping		LC-HRMS
<b>Higher order</b>	Higher order structures	Protein fragment level by LC-HRMS		
	S-S bridges	Peptide mapping (reduced, non-reduced)		
<b>Heterogeneity</b>	Aggregation	Particle Sizer Measurement		SECHPLC
	Charge variants	icIEF		
<b>Post-translational modification</b>	Deamidation/ oxidation	Peptide mapping		IEX-MS
<b>Activity</b>	Potency	ELISA		

# Analytical methodology

Cell-based Medicinal Products

# Analytical methodology - CBMP

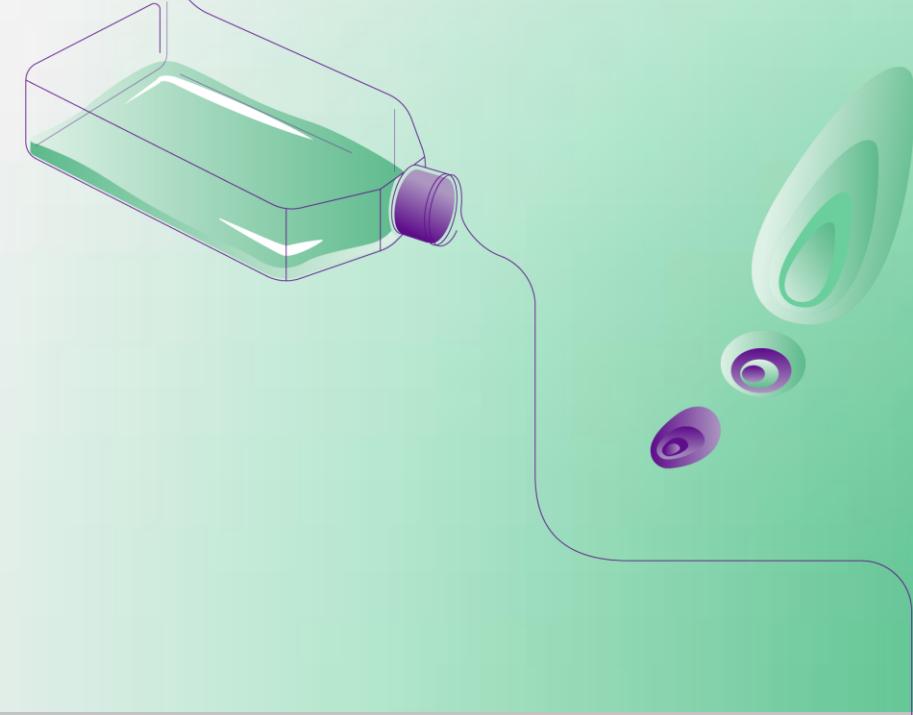

Product characterisation	Product attributes	Analytical method	
<b>General quality</b> <b>Physicochemical</b>	Appearance/ Clarity/ Color/ pH	Visual Inspection	Ph. Eur. 2.2.1/ Ph. Eur. 2.2.2/ Ph. Eur. 2.2.3
	Osmolality	Osmometric	USP<785>/ Ph. Eur. 2.2.35
	Extractable volume	USP<1> / Ph. Eur. 2.9.17	
	Particle contamination	Subvisible particles	Ph.Eur. 2.9.19 (method I)
<b>Quantity</b>	Cell count/ Cell viability	FACS	
	RNA/ DNA content	UV spectroscopy	
<b>Characterization</b>	Primer & probe design	RT-qPCR	
	Characterization	FACS/ MSD/ ELISA	
<b>Identity</b>	Identity	RT-qPCR/ FACS	
	Absence of markers	FACS/ ELISA	
	Gene expression	RT-qPCR	
<b>Safety</b>	Mycoplasma		
	VSV-G	RT-qPCR	
	Vector Copy Number		

# Analytical methodology - CBMP

Product characterisation	Product attributes	Analytical method
<b>Assay, purity &amp; content</b>	Expression of markers	FACS/ ELISA
	Percentage of dead cells / undesired cells	FACS
	Assay/ purity	LC-HRMS
	RNA content	UV Spectroscopy
	Purity/ impurity	LC-HRMS
	Water content	KF
	Residual solvents	GC
<b>Potency</b>	Biomarkers	FACS/ ELISA
	In vitro expression	Cell-based assays
	Enzymatic assays	UV spectroscopy/ Fluorescence/ Luminescence
	Gene expression	RT-qPCR

# Analytical methodology

mRNA vaccines

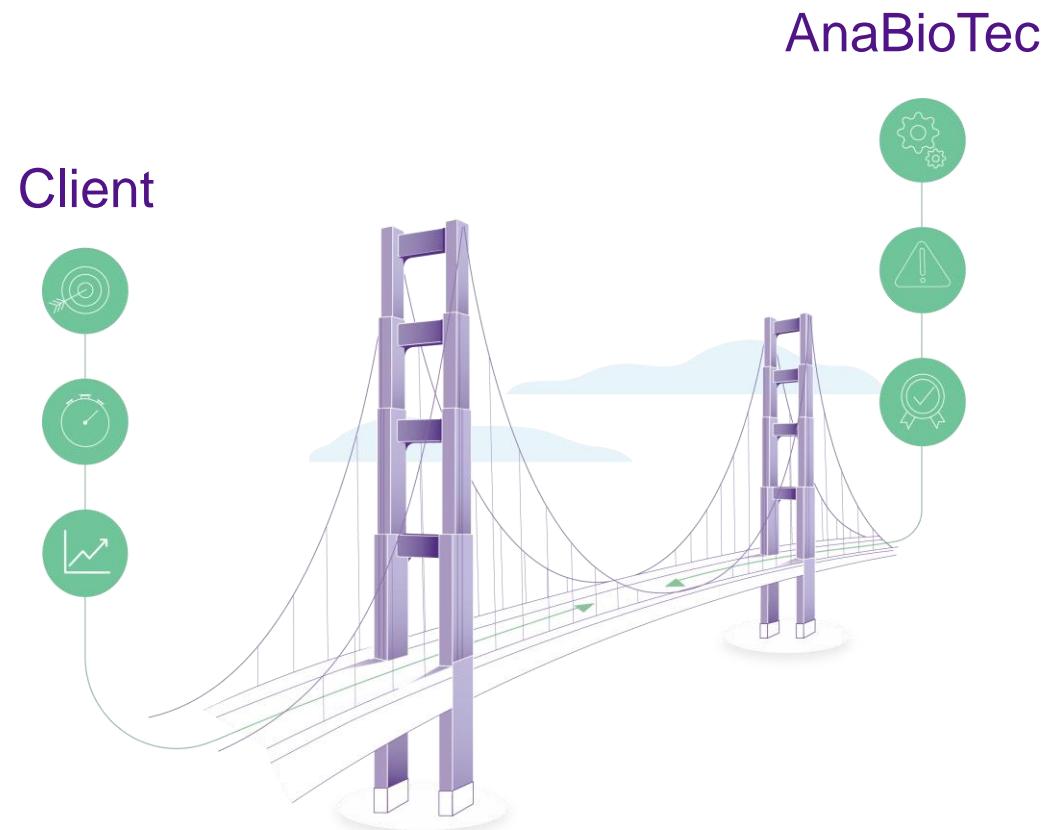

# mRNA vaccines

Product characterisation	Product attributes	Analytical method	
<b>General quality Physicochemical</b>	Appearance/ Clarity/ Color/ pH	Visual Inspection	Ph. Eur. 2.2.1/ Ph. Eur. 2.2.2/ Ph. Eur. 2.2.3
	Osmolality	Osmometric	USP<785>/ Ph. Eur. 2.2.35
	Extractable volume	USP<1> / Ph. Eur. 2.9.17	
	Particle contamination	Subvisible particles	Ph.Eur. 2.9.19 (method I)
<b>Characterization</b>	5' Cap	LC-HRMS	
	Poly A tail	LC-HRMS	
	LNP characterization	Malvern particle sizer	
<b>Identity &amp; sequence</b>	Identity	RT-qPCR	
<b>Assay, purity &amp; content</b>	Assay/ purity	LC-HRMS	
	RNA content	UV Spectroscopy	
	Purity/ impurity	LC-HRMS	
	Water content	KF	
	Residual solvents	GC	

# mRNA vaccines

Product characterisation	Product attributes	Analytical method
Assay, purity & content	RNA integrity	CGE
	RNA impurities	CGE
	LNP size	DLS
	LNP polydispersity	DLS
	LNA component content	HPLC-CAD
	Res HCD/ Res HCP	RT-qPCR/ ELISA
	Res dsRNA	Immunoblot
	RNA encapsulation	Fluorescence assay
Activity	Potency	In vitro expression by cell-based assays

# Our approach, valued by our customers

“AnaBioTec has been instrumental in the success of our program. They have developed our potency assay after our initial QC lab failed and have been running it ever since for release and stability.

“Whenever I have a new project, I always consider Anabiotec for the analytics now.”

Peter Tjeerdsma, Director of CMC  
Staten Biotechnology
